## SHELF-LIFE STATEMENT – Cable Ties

Advanced Cable Ties recommends the following conditions to maintain optimum performance of its cable ties:

***The product is to be stored in its original sealed package and box, in a 50% relative humidity (RH) environment at a temperature of 70°F/21°C. Product should also be kept out of direct sunlight, until installation.***

If these storage conditions are met, a nylon one-piece cable tie will have a shelf life of one year or longer. Shelf life can be significantly affected by storage conditions.

Note: Natural colored cable ties may yellow over time. This is expected and is a normal occurrence with Nylon 6.6.
