SHELF-LIFE STATEMENT - Accessories

Advanced Cable Ties recommends the following conditions to maintain optimum performance of its cable tie accessories and clamps:

Product is to be stored in its original sealed package and box, in a 50% relative humidity (RH) environment at a temperature of 70°F/21°C. Product should be kept out of direct sunlight, until installation.

If these storage conditions are met, nylon cable tie accessories and cable clamps will have a shelf life of two years or longer. Shelf life can be significantly affected by storage conditions.

Note 1: Mounting pad bases with adhesive expire 2 years after being manufactured.

Note 2: Natural colored cable tie accessories and cable clamps may yellow over time. This is expected and is a normal occurrence with Nylon 6.6. There is no degradation in product performance due to yellowing over time.
