Cable Tie Removal Tool Grips contain Diisononyl phthalate (DINP), TSCA Inventory Substance. Jan 14, 2025 — EPA has determined that DINP presents an unreasonable risk of injury to human health, because workers could be exposed to high concentrations of DINP in mist when spraying adhesive, sealant, paint, and coating products that contain DINP

Municipal water used to condition cable ties may contain unavoidable trace quantities of PFAS below the maximum contaminant levels allowed by MassDEP and EPA Safe Drinking Water Act April 10, 2024.
